Ability Profiler

Help them Discover Their Potential

Empower users with new insights about themselves with the Ability Profiler, a computer-administered assessment adapted from the latest paper-based O*NET Ability Profiler. The Ability Profiler is an assessment tool designed specifically for career exploration, planning and counseling by measuring aptitudes and providing individuals with occupational leads.

Valuable Career Relevance

The Ability Profiler demonstrates the relevance between aptitude scores and the world of work by relating aptitude levels to more than 650 specific O*NET occupations based on the information about job aptitude requirements from the U.S. Department of Labor.

Simple to Use

On-screen directions and test taking hints make the program easy to use. Test takers can work independently and require minimal assistance. Raw scores from the mark-making and dexterity board exercises can be manually entered to provide a more comprehensive view of the user's abilities. You get a printed profile of tests results immediately.

Connects Easily to Choices®

Ability Profiler test results are automatically imported into *Choices CD Edition*. Easy-to-understand results assist users in identifying their strengths, occupations that match their strengths, and areas in which they may want to expand their training.
