

Career Futures[®]

Enhance Self-Awareness

Start the exploration process from the inside out. Career Futures helps middle school students understand how interests relate to jobs as they easily match their likes and skills to real-world opportunities.

Engage Career Exploration

Career Futures effectively adds relevance to the classroom experience as students compare various occupations with the required skills and education levels. Hands-on activities and assessments engage students in career exploration and planning as they learn about living on a budget and writing a resume.

Make Confident Career Choices

Excite students about future possibilities as they explore all their career options and make meaningful high school plans. School-to-career planning is made easy with suggested school courses for 9th to 12th grade, career pathways and Department of Labor Career Clusters. The electronic portfolio helps students put it all together.

Empower More Personalized Planning

High school planning becomes more effective with Career Futures' customizable System Manager. Easily edit course plans, reporting features, and local information, or add your state's Career Clusters for even more customized planning results.

Make Smart High School Plans

“Career Futures plants a seed—it is personal and also promotes sharing among the students.”

—Diane Wink, 8th Grade Counselor
