Mississippi Selects Xap/Bridges for Another Year of College and Career Planning Success

Statewide contract supports students with Bridges' industry-leading online career planning solutions

IMMEDIATE RELEASE

Culver City, CA – December 6, 2007 – The Mississippi Department of Education has selected Bridges Transitions, a Xap Corporation company, to provide students and schools with another year of statewide access to Choices® online and software-based education and career planning products. Bridges was originally awarded the contract through a competitive RFP process in 2002.

Bridges' industry-leading planning products include:

- Choices Explorer delivers a motivational foundation for education and career exploration with original, student-requested content.
- Choices Planner empowers students with personalized, self-directed planning tools and validated assessments that help them compare, connect and choose from a vast network of college and career opportunities that best fulfills their dreams.
- Choices CD, the software-based version of Choices Planner, and Career Futures software for high school planning, will be also made available statewide to sites without internet access.

“A statewide customer since 1995, Mississippi has seen the persistent value in investing in student futures through the use of Choices,” said J. Michael Thompson, CEO of Xap Corporation. “We look forward to continuing to help students and schools throughout the state over the next year.”

About Xap
