

What's New for Choices CD Edition?

This year Choices® CD Edition has undergone few changes, reflecting the shift in customer preferences toward products that are delivered online. We continue to enhance both our CD-ROM software and our online products, with an emphasis on database updates for Choices CD Edition this year.

Updated Occupational Database

The Choices Occupational Database has been updated with the most current information available. Some occupations have been removed or added, and some data has been updated.

New Download Process

In order to streamline the installation process, Choices software customers may download their Choices software directly at www.bridges.com. This download process enables customers to receive their Choices software sooner and will simplify software installation.

Common Authentication

This year Bridges will be introducing common authentication across all of our online products. This enhancement has been requested by many of our customers, and will allow us to harmonize every site's subscriptions beneath one set of access codes at a shared login portal located at www.bridges.com.

For Choices software customers, this enhancement will allow sites to automatically transfer their Choices Site ID and Password over to Choices Planner should they choose to eventually switch to the online version of Choices.

Get to Know Choices Planner - the Online Version of Choices!

A growing number of Choices CD Edition users are discovering how the power of Choices is enhanced in the online version, Choices Planner. Available in both English and Spanish, Choices Planner provides more flexibility than CD-ROM software to continually meet our customers' needs. We encourage you to contact your Regional Manager at 1-800-281-1168 or visit our website www.bridges.com to sign up for a free trial of Choices Planner.
