

## What's New in Choices Explorer?

We love to hear how we can improve! Every year, we add new features and enhancements in response to your feedback. We're excited to let you know what we've done recently to improve your Choices Explorer experience.

### Fall 2009

**Increased portfolio storage** – Many students want to get full use of their portfolio. We've expanded the storage capacity of each portfolio so they can store more information for even greater detail in their plans.

**Portfolio passwords** – To further tighten the security of our site and to reduce the number of typos in student passwords, we now ask for passwords to be entered twice when creating a portfolio.

**School-wide Portfolio Creation** – There is now a tool to help professionals create multiple portfolios for an entire school if they do not subscribe to the Guidance Central Custom Portfolio Services. Professionals can upload customized data files using the Create Student Portfolios feature in the Reviewer section of the Professional Tools.

**Do What You Are results** – If your school also subscribes to Do What You Are, the assessment results will be stored in the student portfolios under Your Personality Type & Learning Style.

**Learning Style Inventory results** – If your school also subscribes to the Learning Style Inventory, the assessment results will be stored in the student portfolios under Your Personality Type & Learning Style.

**New articles** – Choices Explorer's content is updated on a regular basis in response to developing career trends and student requests. We're constantly rewriting articles and adding new information.

Here's a sample of the new articles we've added recently, or are currently creating:
